PROFESSIONAL SUMMARY

Frontend engineer with close to 5 years of hands-on experience building responsive and user-focused web applications using React, Next.js, JavaScript and TypeScript. Passionate about creating seamless digital experiences and continuously improving through collaboration and learning. Strong foundation in modern frontend development, API integration, and performance optimization, now building core banking software in fintech.

WORK EXPERIENCE

Peerless SGS , *Frontend Engineer* 04/2026 – Present | Hybrid, Lagos

Fintech company building core banking software for banks and financial institutions

- Develop and maintain scalable frontend modules for Mizan and SeaBaas, a core banking platform, using React, TypeScript, and microfrontend architecture.
- Build reusable component libraries and shared UI patterns that improve consistency, maintainability, and development efficiency across teams.
- Integrate RESTful APIs and collaborate closely with backend engineers to deliver reliable features that support critical banking operations.
- Design and implement responsive interfaces that simplify complex workflows and enhance the overall user experience for platform users.
- Contribute to code reviews, architectural discussions, and performance improvements to ensure scalability, stability, and high code quality.

FieldMaxPro - Papyrus Digital Solutions 05/2025 – 03/2026 | Hybrid

Frontend Engineer (NYSC Corps Member)

- Built and maintained frontend infrastructure for an enterprise Field Force Management platform serving large enterprise clients, including Lafarge, GB Foods, Mouka Foams, and Vixa Pharmaceuticals, supporting 10,000+ field agents across multiple regions.
- Built and maintained a React / Next.js DASHBOARD web application serving 50,000+ daily active users, achieving 99.7% uptime and sub-2s page load times.
- Designed scalable frontend architecture and reusable components using TypeScript, Tailwind CSS, and modern JavaScript best practices.
- Integrated 150+ RESTful APIs, implementing robust error handling, retries, and loading states to ensure reliability in real-world network conditions.
- Investigated and resolved a critical production issue impacting 15,000+ users, significantly reducing failed transactions through improved request handling.
- Collaborated with backend, product, and design teams in an Agile environment to deliver features aligned with business and user needs.
- Participated in code reviews, testing, and debugging to improve application stability

Freelance, *Frontend Developer* 01/2024 – 03/2025 | Remote

- Built and deployed responsive web applications for clients using React, Next.js, and Tailwind CSS
- Developed interactive dashboards, landing pages, and web interfaces with a focus on usability and performance
- Integrated APIs and implemented features such as authentication, data visualization, and real-time updates

Aipalbot , *Frontend Engineer* 11/2022 – 12/2023 | Remote

- Developed and maintained features for an AI chatbot platform used by 10,000+ monthly users across web and mobile, built with React, Next.js and TypeScript.
- Built the core chat experience, including streamed AI responses, conversation history, markdown rendering and code syntax highlighting.
- Integrated RESTful APIs and WebSocket connections for reliable communication with AI models in real time, significantly improving request success rates.
- Built responsive, reusable UI components with Tailwind CSS and contributed to testing that improved application quality and release stability.

Softdrobe , *Frontend Engineer* 02/2022 – 10/2022 | Remote

- Optimized the frontend for mobile, improving site responsiveness and growing mobile traffic by 18%.
- Helped translate designs into usable interfaces and applied responsive design principles, lifting the site's usability score by 15% (measured by feedback tools).
- Built a Progressive Web App (PWA) and worked with backend teams to integrate the frontend cleanly with APIs.

SKILLS

Languages (JavaScript (ES6+), TypeScript, HTML5, CSS3) | **Frameworks & Libraries** (React.js, Next.js, Vue.js, Node.js) | **Styling & UI** (Tailwind CSS, Material UI, Sass, CSS Modules, Styled Components, Shadcn/ui)

Tools (Git/GitHub, Figma, Vercel, Netlify) | **Methodologies** (Agile/Scrum, TDD, RESTful API Integration, Responsive Design, Component-Based Architecture)

CERTIFICATES

McKinsey.org Forward Program (Forward is a free multi-week learning program designed to equip individuals at different stages of their careers)

NOTABLE PUBLIC PROJECTS

AirSoft Studios
A fantasy Art website built with NextJS & TypeScript, TailwindCSS and animation for styling and implemented Tawk for live chat software.

CRWN-Clothing
Built a scalable e-commerce platform with authentication and processing (Stripe), and optimized checkout flow with performance improvements resulting in faster load times

EDUCATION

Federal University of Technology, Akure, *BTech Industrial Chemistry* 01/2018 – 11/2023
GPA: 3.92 / 5.0
